

DEEPAK CHANDRASEN

Senior Software Engineer | Full-Stack Developer (PHP • Node.js • React) | Engineering Team Lead

Pandariya, Kabirdham, Chhattisgarh, India | +91 8871901655 | +91 8770299753 | deepakchandrasen2707@gmail.com | linkedin.com/in/deepak-chandrasen-47874318b

PROFESSIONAL SUMMARY

Senior Software Engineer with 4+ years of full-stack experience building and leading delivery of HRMS, fleet management, mobility, OTT, and e-commerce platforms. Currently leading two engineering teams (8 developers combined) at Oneclick IT Solutions, owning architecture, sprint delivery, and code quality for enterprise clients including TerraMar Networks. Track record includes a 90% database performance improvement, end-to-end ownership of a global fleet-tracking platform architecture, and mentoring junior developers into independent contributors. Core strengths: PHP/Laravel and Node.js/NestJS backend architecture, Angular and React Native front-end delivery, REST/OAuth API design, and AWS-based deployment. Adaptive to AI-assisted development workflows (ChatGPT, Claude, Kiro) to accelerate prototyping and code quality.

CORE TECHNICAL SKILLS

Backend (Primary): PHP, Laravel, CodeIgniter, Node.js, NestJS

Frontend & Mobile: Angular, AngularJS, Next.js, ExtJS, React Native, Ionic

Cloud & DevOps: AWS (EC2, S3), CI/CD Pipelines, Elasticsearch, Logstash, Kibana

Databases & Payments: MySQL, PostgreSQL, Stripe API, Razorpay

Architecture & Practices: RESTful API Design, OAuth 2.0, Role-Based Access Control, Database Optimization, Microservices, Responsive UI

Leadership: Team Management (8 engineers), Code Review, Mentoring, Architecture Planning, Sprint Delivery

AI-Augmented Development: ChatGPT, Claude, Kiro — used for rapid prototyping, code review, and technical documentation

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Oneclick IT Solutions

Nov 2023 – Present

- Lead two engineering teams (8 developers total) delivering HRMS and fleet-management platforms for enterprise clients, owning architecture decisions, sprint planning, and code-quality standards end to end.
- Architected and automated employee leave-calculation workflows using scheduled cron jobs, removing manual HR processing for the company's full employee base.
- Serve as Senior Developer on TerraMar Networks, a global asset-tracking and fleet-management platform spanning logistics, mining, oil & gas, and maritime sectors — leading architecture planning and end-to-end delivery.
- Run structured code reviews and enforce coding standards across both teams, raising code quality and reducing rework on production releases.
- Mentor junior and mid-level developers through pairing and review, growing them into independently productive contributors.

Software Engineer | Skills Outsource

Jun 2022 – Aug 2023

- Designed and built REST APIs with secure OAuth 2.0 authentication, forming the core integration layer for client applications.
- Improved core database query performance by 90% through targeted indexing and query optimization, directly cutting report and page-load times.
- Built internal automation scripts that removed recurring manual operational work for the engineering team.
- Mentored junior developers and led code review cycles, raising team-wide coding standards.

Full Stack Developer | Chip N Web Technologies

Jan 2021 – May 2022

- Designed RESTful APIs enabling integration across multiple internal applications.
- Built a real-time messaging system with a secure authentication layer.
- Implemented responsive, multi-device UI, improving usability across mobile and desktop.
- Built and deployed a CI/CD pipeline that accelerated and standardized release cycles.

KEY PROJECTS

Pawking — Pet Services Marketplace (Flagship Project) — NestJS, Next.js, PostgreSQL, Stripe, AWS

- Built a full-stack two-sided marketplace connecting pet owners with service providers, covering the complete booking lifecycle from request through payment to completion.

- Architected a modular NestJS backend with PostgreSQL, integrated Stripe for secure payments and automated billing, and implemented geo-based provider discovery with role-based access control for users, providers, and admins.
- Resolved booking-conflict concurrency issues to maintain data consistency, and optimized APIs and database queries for performance at scale.

Fleet Management System — TerraMar Networks — *ExtJS, PHP*

- Led architecture and end-to-end development of a fleet/asset-tracking platform for a global logistics, mining, oil & gas, and maritime client, including real-time tracking, maintenance scheduling, cost analytics, role-based access control, and ERP/finance/CRM API integrations.

AduX Advertising Platform (adux-bo.com) — *CodeIgniter, AngularJS*

- Built an advertising management platform balancing ad effectiveness with user experience.

Veelo Mobility App — *React Native, Node.js, Angular*

- Built mobile platforms for EV riders and battery-swap point services, including live location tracking and booking.

AcomTV Dashboard (acomtv.com) — *Laravel*

- Built the admin dashboard and APIs powering subscription plans, reseller management, and streaming controls.

Sutra Clothing E-commerce (sutraclothing.in) — *Laravel*

- Built an e-commerce portal for saree sales with advanced categorization and admin controls.

EDUCATION

B.E., Computer Science — **RSR Rungta College of Engineering & Technology, Bhilai** (78.80%, 2021)

Higher Secondary (10+2) — Govt. Higher Secondary Boys School, Pandariya (78.6%, 2016)

High School — S.S.M Pandariya (65.5%, 2014)

ACHIEVEMENTS & CERTIFICATIONS

- Continuous Performer of the Quarter — Oneclick IT Solutions (awarded twice)
- Star of the Month Award — Oneclick IT Solutions
- Vocational Training Certificate, PHP — Globussoft
- Vocational Training Certificate, Java — Onet
- Python Workshop — IIT Kharagpur
- IoT Workshop — IIT Bhilai
